IAC Products

Dimension 4 Workstations

The most versatile workstation available today. Ergonomic design, adjustable components, endless accessories, modularity, and a clean, stylish appearance are all hallmarks of the "D4."

Pro Series Workstations

Cantilever leg design and smooth hydraulically-actuated height adjustment make the Pro Series the pinnacle of standalone workstations. Easily enhanced with instrument shelves and MTS upper structures.

- **900 Series**—Mechanically adjustable
- **950 Series**—Manual hand crank adjustable
- **960 Series**—Hydraulically adjustable

Cleanroom Products

Designed for Class 100 environments.

- **5000 Series Workbenches**—Completely sealed
- **AirClean™ Laminar Flow Workbenches**—Vertical or horizontal flow models

Isles Series Workbenches

IAC's versions of the "basic" workbench for the technical and lab environment. Hundreds of pre-configured models available. Drawers, shelves, lighting, and other accessories provide endless customization.

- **E Series**—Benches with standard 4-leg or 2-leg plus one pedestal
- **C Series**—Dual pedestal benches

Material Handling

The shortest distance between two points is found with IAC Material Handling equipment.

- **Rolling Carts**—Extruded aluminum construction matches Dimension 4 equipment.
- **MTS Rolling Storage**—Ergonomics and configurability to suit all operators and tasks.
- **Mobile & Stationary Accessory Stations**—Position accessories adjacent to task location.
- **Mobile Cabinets**—Lockable storage units on freewheeling casters.
- **Gravity Feed Racks**—Keep parts and materials "down in front" within easy reach.
- **Conveyor Systems**—Metal or plastic roller, inlaid skate wheel or ball transfer versions.

LAN Stations

Modular and adjustable design based on Dimension 4 workstations. LAN Stations feature integrated cable management and computer/electronics-related accessories, making them ideal for digital production suites or communication cells.

Electronic Production Support (EPS) Carts

Material handling products designed and manufactured to deliver the extra care needed in electronics production environments.

- **Conductive Tray Carts**—Transport printed circuit boards safely; two heights.
- **Feeder Cart & Shelving**—Store component feeders & reels used at pick-and-place equipment.
- **Storage Carts & Shelving**—A great way to store stencils or reels; two heights.

Packaging Stations

These specialized benches provide a rugged platform for a wide range of activities that help keep products moving out the door. Accessories include shelves, shelf dividers, electrical channels, lighting, paper/wrap spool holders, and swing arm-mounted document holders, and computer platforms.

Multi-Task Systems (MTS)

MTS upper structures provide “above-the-worksurface” storage and accessory organization. Uprights feature dual slots for strong support of half-length or full-length options. Mount to IAC or other brand workbenches of similar dimensions.

Task Handling Systems (THS)

- **THS Workstations**—Slotted uprights offer excellent height adjustability of worksurfaces, lighting and wide range of productivity accessories. Easily configured into “L” and “U” shaped cells.
- **TaskMate™ Upper Structures**—Converts any basic workbench into a full-function workstation with productivity and ergonomic enhancements for operators.
- **THS Shelving Units**—The ideal solution for organizing inventory, shipping areas and tool cribs. Slotted uprights position shelves at 1-1/4” increments. Single- or double-sided.

Production Systems Group (PSG) Products

Spacestation™ Workstations

A versatile design with the expandability to meet a company’s growing needs. Modules connect together to form assembly lines and cells.

EZE Workmaster™ Workbenches

EZE...because they assemble with a single tool. With a built-in footrest and huge selection of accessories, EZE Workmaster is anything but basic.

Workmaster™ Pedestal Workbenches

At home in technical and laboratory environments, Workmaster benches offer a wide variety of drawer and cabinet configurations. Optional lab shelf allows addition of power options and space for instrumentation.

EZE Reach™ Upright Posts Set

The most economical upper structure available for your workbenches. Add shelves, electrical channels, lighting, bin rails and a multitude of other productivity accessories.

Kinatechnics™ System 1 Workbenches

Cold-rolled steel construction and H-leg design make these workbenches truly heavy-duty. Built-in slotted upper structure makes addition of shelving and lighting a snap.
